In the past, two prisoners were allocated in each prison cell. If there are 6 cells, how many prisoners would there be in all?

The walls of the cells and corridors in the old prison are covered with graffiti.

In one of the cells, a prisoner sculpted this date.

Write the date in short form-dd/mm/yr:

What day of the week was the 20\textsuperscript{th} of June, 1802?

How many years have passed from this date?
In another cell, another prisoner sculpted the number of days he has been kept in prison: 365 and 275.

Write these numbers in words:

365 -  

275 -  

What do you think that the number 365 represents?  

For how many days has he been in prison?  

What is the difference between the two numbers?  

Round to the nearest 10, nearest 100:

365 -  

275 -  

Look at the 6 numbers in the photo.
Using each digit only once, make 3 different, 2-digit, even numbers.

Which of the 3 numbers shown in the photo make 15 when they are added together?

= 15
At the old Prison Museum there are various publications for sale.

How much does the most expensive book cost?

Which book costs least?

Is it possible to buy ‘The Prison Experience’, ‘Roots of a Nation PB’ and ‘Heritage Malta Map’ with a 20 Euro note?

If yes, do you get any change? If no, how much more money do you need to buy the three books?

At the exit of the Old Prison Museum there is the Maltese flag. Circle the best estimate for the height of the pole.

1m  300cm  10km
