

Decimals – Investigation

Dear Investigator,

I am the president of a company that makes gloves and mittens. We are making a collection of gloves and mittens for kids your age. You could be a big help to us as we make this new collection of gloves and mittens.

We would like you to get some hand measurements of kids your age. We have given you some information on how to measure the hand length and the hand span. We would like you to measure to the nearest tenth of a centimetre. We would also like you to put the measurements for both the hand length and hand span in order from least to greatest.

We will use these measurements to help us make gloves and mittens that are the right size.

Sincerely,

Kate Darmanin
President
Darmanin Glove and Mitten Company

Information

For each person, measure each of the following to the nearest tenth of a centimeter.

Hand length

Measure from the bend in the wrist to the tip of the middle finger.

Hand span

Measure from the tip of the thumb to the tip of the little finger.
