

# Five Star

- Take turns to play. Choose one of the star numbers shown. Roll the dice ( 1 – 6). This is the denominator.
- Write the fraction. For example, you choose 25, roll a 4 and write  $\frac{25}{4}$ .
- Each turn the fraction into a mixed fraction, for example,  $6\frac{1}{4}$ .
- Compare the fractions. If your fraction is closest to 5, you win that round and score five points.
- Keep playing until one of you scores 30 points.
