

Which two numbers?

What you need:

- Paper and Pencil
- Decimal grid
- 1 point cards

- Take turns to choose two decimal numbers from the grid. Work out the total and write it on paper.
- Show the others your total, for them to guess which two numbers you chose.
- Take a point for every wrong guess the others make!
- When the others have guessed the correct two numbers, they check your calculation.
- If it is correct take 2 points.
- If it is not correct you have to place back the points you had earned in this round.
- Keep playing until one person has 30 points.
