

Maths in Space

This is Lily, a female astronaut.

Mission 1 - Lily is on a special mission in space. She will meet different aliens while on her adventure in Space.

Can you create different aliens Lily will meet?

Follow these instructions to draw different aliens:

Roll 1 die. Match the number with the below chart to draw your alien.

Ex: If a 3 is rolled you need to choose one of the noses for your alien. If the same number appears more than once, ignore and roll the die again.

1	2	3	4	5	6
Alien Body	Eyes	Nose	Mouth	Ears	Extras

Take photos of your drawings (you can use your tablet or a mobile phone).

You may wish to share your drawings with us on the following email address:

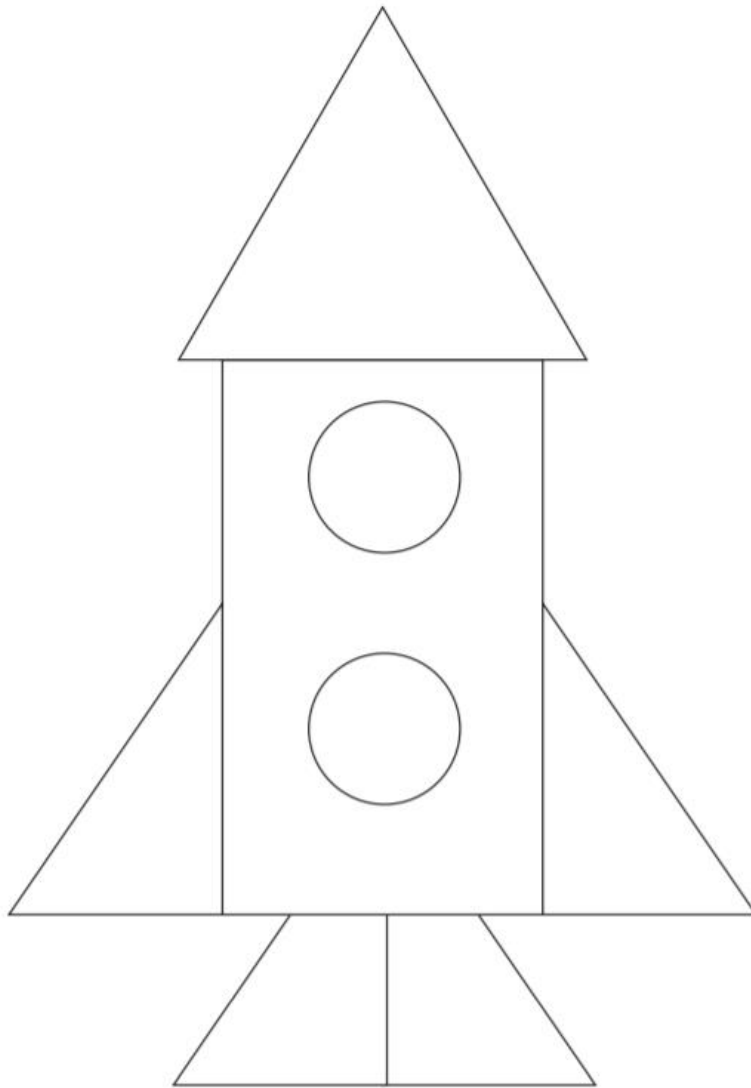

melanie.casha.sammut@ilearn.edu.mt .

Mission 2 –

Below find Lily’s rocket made out of shapes.

What shapes can you spot?

How many of each shape?

Can you use different shapes to create new space ships for Lily?

Take photos of your drawings (you can use your tablet or a mobile phone).
