

It's All About Number Patterns!

Create as many patterns as you can with a middle number 8.

Write 2 numbers before it and 2 numbers after, to create a pattern.

Hint: Your pattern can include whole numbers or even fractions.

		8		
--	--	---	--	--

Now create as many patterns as you can with a middle number 15.

		15		
--	--	----	--	--

Now try a larger number.

		420		
--	--	-----	--	--

The patterns you can create are endless. How far can you go? How creative can you get?
